

## **PUBLIC NOTICE**

To be a leader in World peace by managing peace in South Asia, Phuro Innovations long term goal is to influence an IGO for South Asia. We are South Asia's social impact agency for civil society. Our current members are Business owners, Spiritual leaders and Retired Diplomats, Bureaucrats & Political Veterans, Bankers, Senior Law firms and independent senior Lawyers to help us bring this vision into reality.

As per the above figure, amongst all the spheres, we have already researched, learnt and educated people on [Our Timeline](#) Personal, Social, Institutional and Political Peace. This year we are focused upon educating people on the importance of ecological peace. We have identified Green Hydrogen as our tool, to combat climate change and contribute to world peace by steering South Asia in the Green Hydrogen market on time. We are doing so by filtering correct information and bringing the knowledge together under one roof, advising heads of state / their representatives / related parties.

We are further supporting the idea of generating commonwealth for South Asia, by influencing the Green Hydrogen Bank. We support people's participation in democracy and development as South Asia's agency for civil society.

The main purpose of Phuro Innovation is to create a mechanism for South Asia's inhabitants to work more successfully together in the areas of peace and security, and also to deal with economic and social questions.

Among the oldest IGOs are the United Nations, which deals with diverse topics, however OPEC, on the other hand, is composed only of countries that produce oil. Specialized IGOs, such as NATO limit their activities to a particular field. Similarly, Phuro Innovations will thus be focused to create the IGO limiting its activities to the Green Hydrogen economy.

OPEC, the Association of Southeast Asian Nations (ASEAN), NATO, the African Union (AU), the European Union (EU), and the Organization of American States (OAS) are among the largest non-UN IGOs.

However, we are not limiting ourselves to only large organizations. There are many smaller organizations doing interesting and challenging international work, such as the African Development Bank (ADB) and the Asian Development Bank. IGOs may also focus on trade (e.g., European Free Trade Association), security (NATO), or international crime (Interpol).

You'll find that many UN Committees have non-UN IGOgroups that offer a regional alternative to working within the UN.

Phuro Innovations immediate goal is to offer itself as a regional legal alternative to work within the United Nations; specially at a critical time of climate change and when all other institutions and IGOs are failing in doing so. IGOs typically have the financial, political & legal support of its members along with legal expertise to an IGO's dispute resolution mechanism or executive body.

Data from ICIMOD On melting glaciers of the Pamir, Hindu Kush Himalayan Region, Khimar, IMF DASHBOARD On climate change and world bank reports are warning of emergency crisis in South Asia and we will be wiped off as a civilization.

This is about Rachna Sharma's purpose which she translated in an action post coming back from Harvard Business School, you will find the hard work she has put in to measure World Peace in South Asia on her Phuro Innovations.

By doing so, Phuro Innovations has completed stage one and is working on stage two, with several systematic projects in the pipeline to show action and educate South Asia on the importance of World peace and how its actuality is possible.
