

## **PUBLIC NOTICE**

To be a leader in World peace by managing peace in South Asia, Phuro Innovations long term goal is to influence an IGO for South Asia. We are South Asia's social impact agency for civil society. Our current members are Business owners, Spiritual leaders and Retired Diplomats, Bureaucrats & Political Veterans, Bankers, Senior Law firms and independent senior Lawyers to help us bring this vision into reality.

As per the above figure, amongst all the spheres, we have already researched, learnt and educated people on [Our Timeline](#) Personal, Social, Institutional and Political Peace. This year we are focused upon educating people on the importance of ecological peace. We have identified Green Hydrogen as our tool, to combat climate change and contribute to world peace by steering South Asia in the Green Hydrogen market on time. We are doing so by filtering correct information and bringing the knowledge together under one roof, advising heads of state / their representatives / related parties.

We are further supporting the idea of generating commonwealth for South Asia, by influencing the Green Hydrogen Bank. We support people's participation in democracy and development as South Asia's agency for civil society.

By doing so, Phuro Innovations has completed stage one and is working on stage two, with several systematic projects in the pipeline to show action and educate South Asia on the importance of World peace and how its actuality is possible.
