

ECOLOGICAL PEACE

STRATEGIC FOCUS

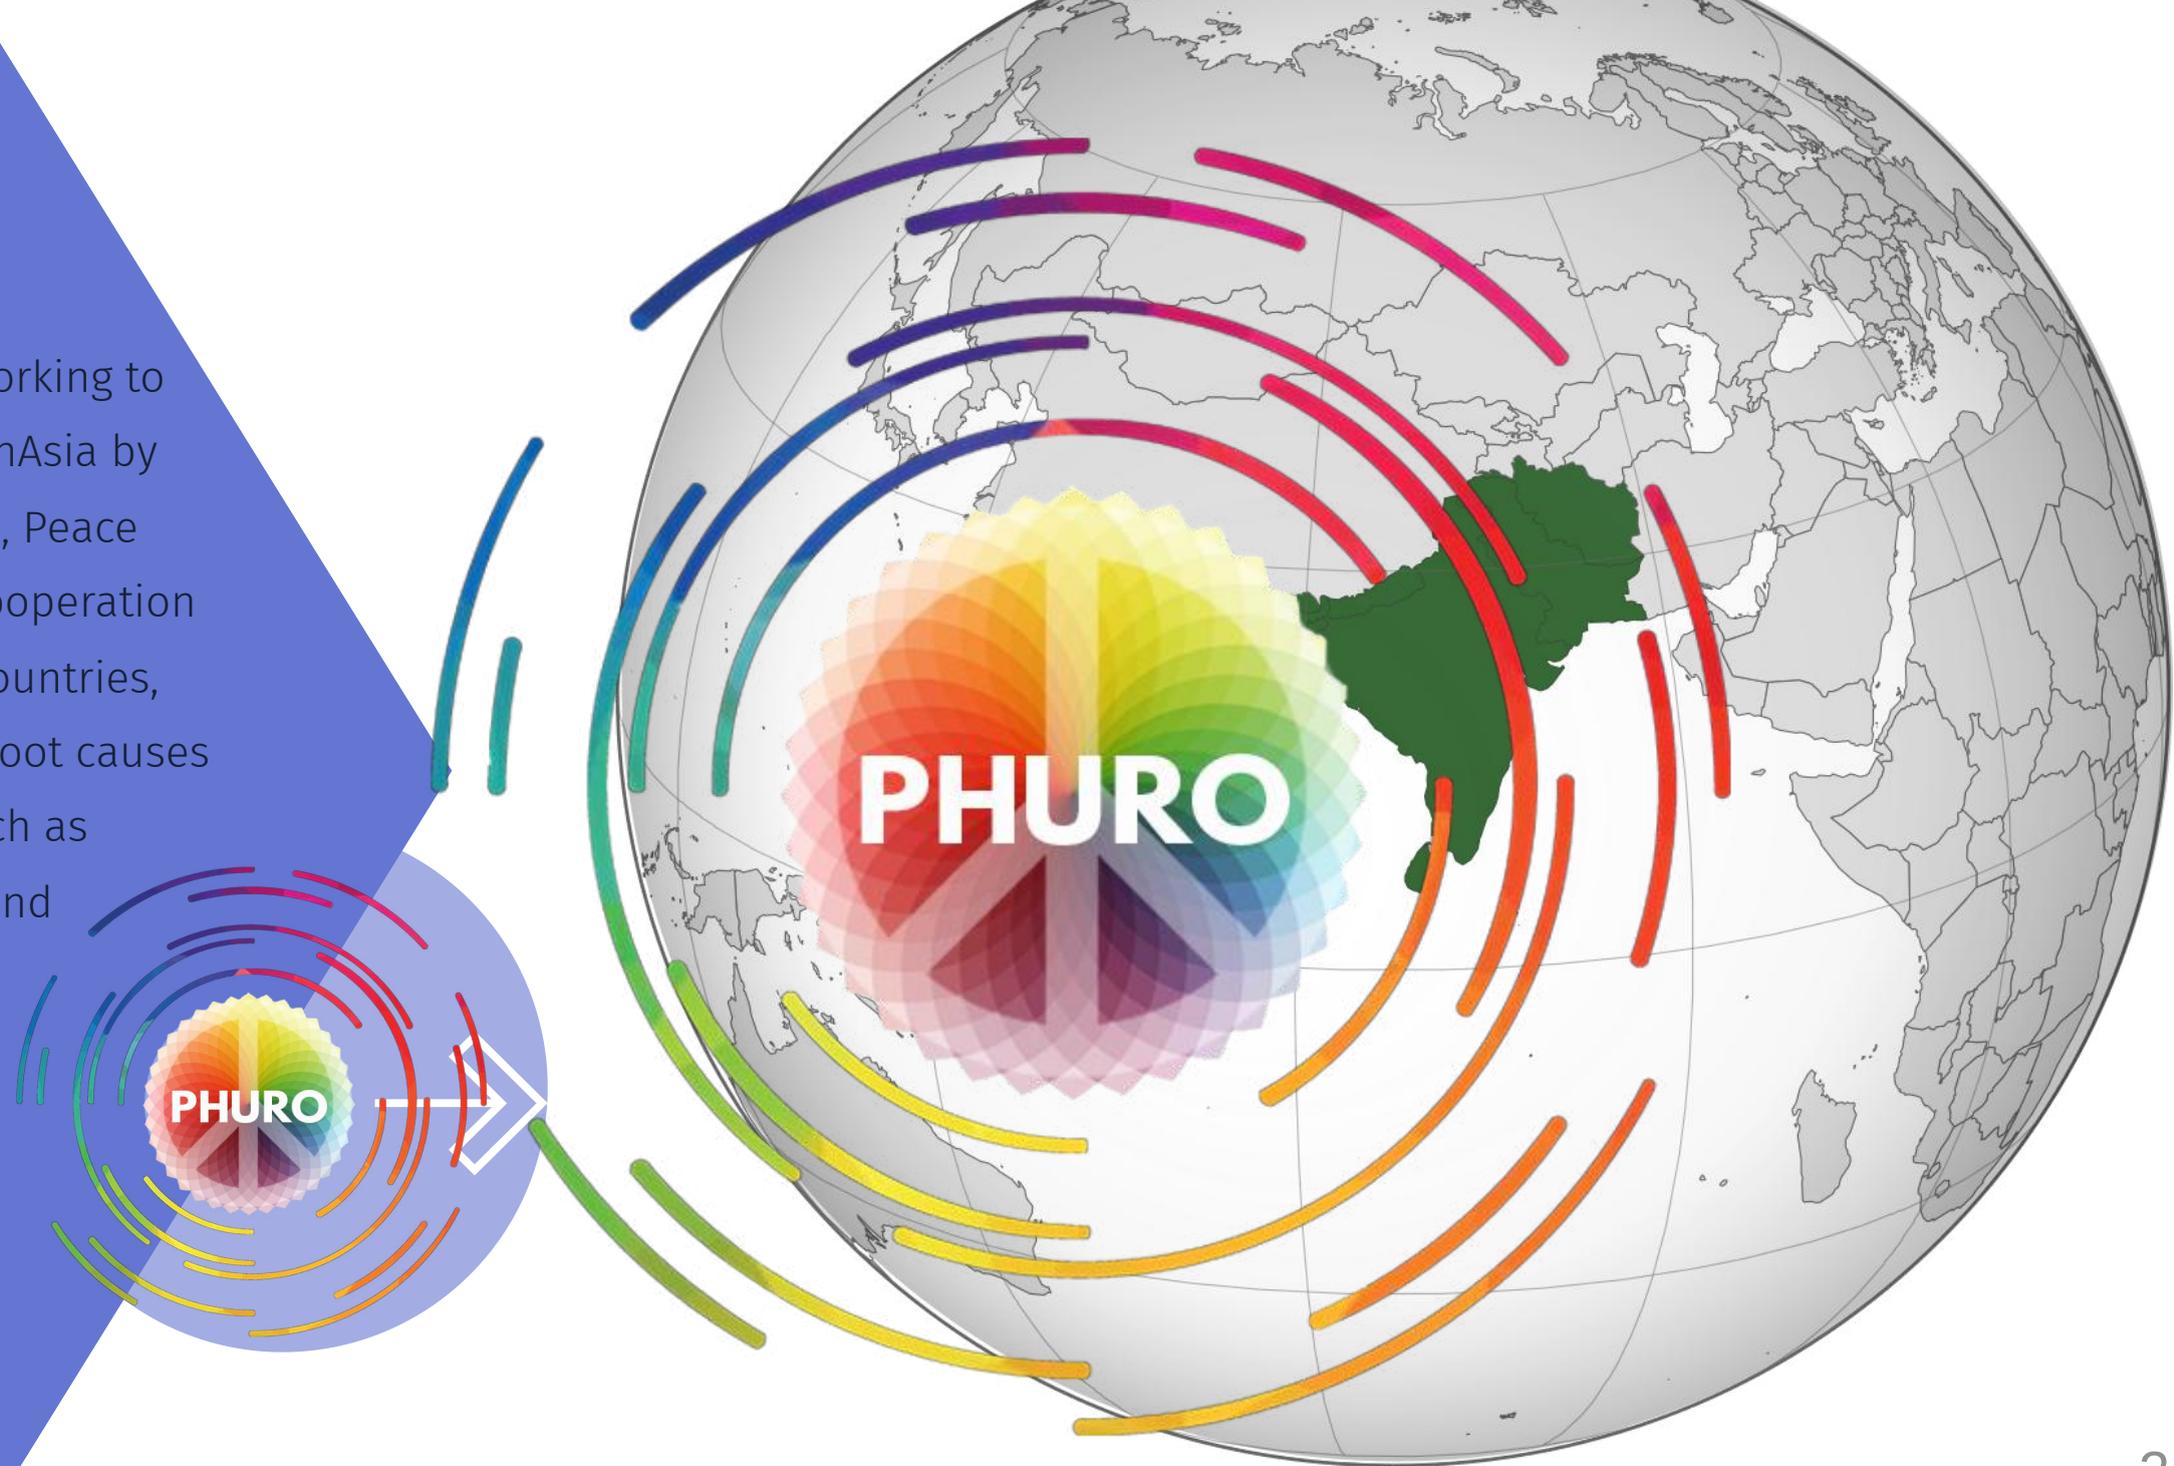

WHAT ARE THE
IMPLICATIONS?
PROS AND CONS.

Summary

EduPhuro Innovations is working to influence an "IGO " in SouthAsia by promoting Green Hydrogen, Peace Treaties and attempts at cooperation amongst individuals and countries, addressing the important root causes of conflict and violence such as poverty, resource scarcity and discrimination.

01

PHURO

Innovative Approach OF PEACE

PERSONAL Peace

Yoga, Meditation & Spiritual Connection

POLITICAL / Institutional Peace

Peace Treaties & Central Government

ECOLOGICAL PEACE

Peace with five elements, earth, sky, fire, air & space

TECHNOLOGY

**AI, Metaverse
Cyber Security, Peace with Laws**

Post Pandemic, in the redesign of Gods new world, I am only trying to redesign a bright & peaceful SAARC.

I was launched in to World peace space because I have seen the absence of World peace which I continue to see around the world and in my own region SAARC.

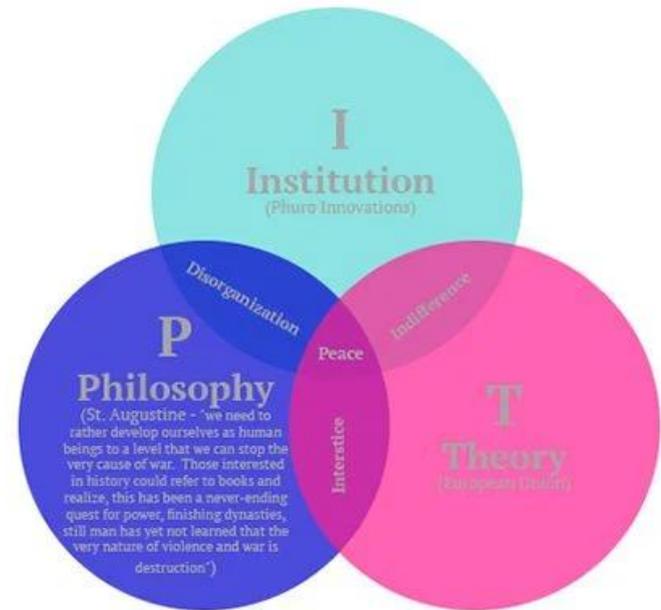

03

Amidst the Pandemic we Innovated the communication channels amidst the Polititons, Business Leaders, Social Leaders and Influential Young minds. The dialogues lead to understanding the underlying International Relations amidst the region and noticed the missing moral foundations of world politics. This lead to Phuro proposing a Venn diagram of peace. Thus Phuro evolved to become the R & D of World Peace in South Asia

Venn Diagram of Peace

$$|P \cup I \cup T| = |P| + |I| + |T| - |P \cap I| - |T \cap P| - |I \cap T| + |P \cap I \cap T|$$

Territory Philosophy Institution Theory Disorganization Interstice Indifference Peace

04

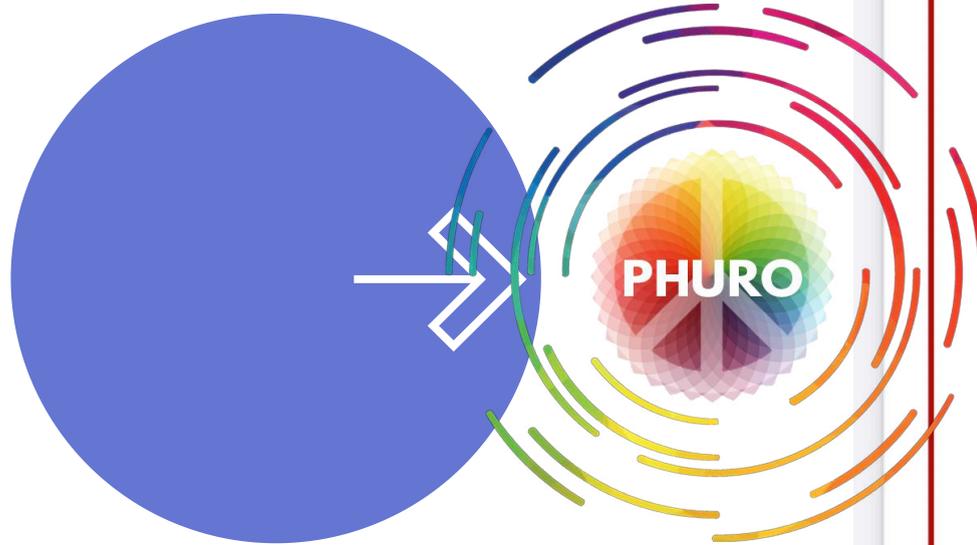

Through the year. Phuro studied reports from World Bank, ICIMOD, IMF dashboard on climate, Hindu Kush Himalayan region and other technical reports available to forecast a conclusion, that it was time to find a replacement of FUEL, which could lead to lesser or zero carbon emissions. Green Hydrogen was thus identified as Oil of the Future.

Green Hydrogen is Gods gift and found in abundance in the environment of South Asia

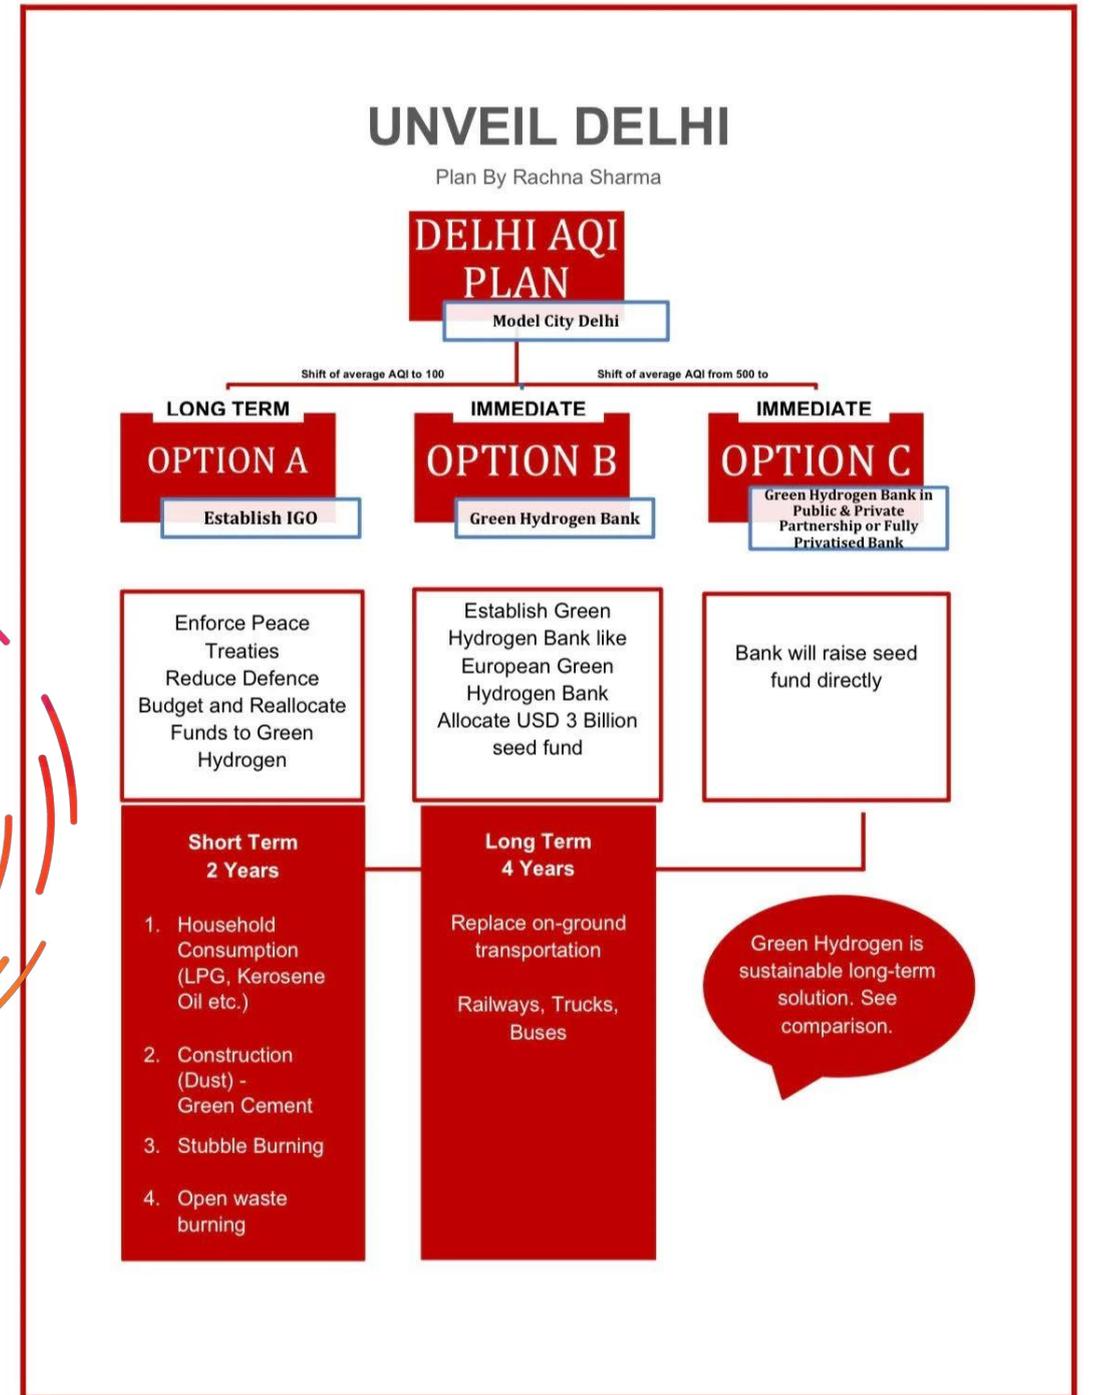

05

As a part of further studies of Ecological Peace, here Rachna Sharma draws a forecasted plan that can be implemented in phases, leading to testing Green Hydrogen in New Delhi, reducing its Hazardous AQI levels which are becoming inhabitable for its citizens. As a supporting formal documentation, filed an appeal / complaint with the First Citizen; President of India. Post which this solution document was also shared with national leaders, Declaring this as public emergency and requesting them to make this as a political agenda

06

Before the General Election 2024, we informed the Honorable Prime Minister to look at the proposal we have shared with PMO. The document outlines the importance of having a central government for South Asia. The IGO would need an institute with prototypes which are already ready with us, hence we do not need to reinvent the wheel. We hope that he considers our proposal.

07

About Phuro Innovation's Vision

To be a leader in World peace by managing peace in South Asia, Phuro Innovations long term goal is to influence an IGO for South Asia. We are South Asia's social impact agency for civil society. Our current members are Business owners, Spiritual leaders and Retired Diplomats, Bureaucrats & Political Veterans, Bankers, Senior Law firms and independent senior Lawyers to help us bring this vision into reality.

As per the above figure, amongst all the spheres, we have already researched, learnt and educated people on Our Timeline Personal, Social, Institutional and Political Peace. This year we are focused upon educating people on the importance of ecological peace. We have identified Green Hydrogen as our tool, to combat climate change and contribute to world peace by steering South Asia in the Green Hydrogen market on time. We are doing so by filtering correct information and bringing the knowledge together under one roof, advising heads of state / their representatives / related parties about the benefits of Green Hydrogen leadership in the long term and that risking their finances in frontier markets like South Asia is safe in the long term. We are further supporting the idea of generating commonwealth for South Asia, by influencing the Green Hydrogen Bank. We participate in democracy and development as South Asia's agency for civil society.

Phuro Innovations further held a Press Conference, educating journalists / media professionals on Climate change and requested them to help propagate their initiative of New Climate Change Law .
