## PRESS RELEASE

### **MEDIA ADVISORY: PHURO INNOVATIONS ANNOUNCES THE WILD CARD - "VIOLATION OF THE NATURAL LAW"**

**WHY:** As global temperature crosses the 1.5°C legal limit, **the stability of the South Asian region is under threat from glacial melt and resource scarcity.** The briefing will present data-driven location wise, temperature change visualizations to ensure long-term regional and planetary survival.

**WHAT:** Phuro Innovations, a leading independent online, Non Academic, Public Policy research institution for World Peace; Headquartered in New Delhi, India will host a strategic media brief to unveil its Ecological Peace Framework to "Save the third pole -Himalayas."

The briefing will **"detail how human-driven disruptions to the natural elements Earth, Water, Fire, Air, and Space are fueling global conflict"** and will propose a roadmap for intergovernmental organization on the Himalayas.

**WHO:** Rachna Sharma, Founder & President of Phuro Innovations and Harvard Alumni, who also served as Former Chairperson, founding member & Co-Chair of Harvard Alumni Entrepreneurs India.

**WHEN:** 6th February 2026

**WHERE:** Global web LIVE Telecast, New Delhi, India / Access Available

# PHURO INNOVATIONS

## STATEMENT OF INTENT

"If the Himalayas fall, the world follows. We are fighting for the biological and tectonic foundation of our planet. Today, we offer a Venn Diagram of Peace: a logic-based roadmap that uses the manufacturing might of China, the diplomatic wisdom of France, and the spiritual heritage of India to create a non-disruptive sustainable future. The math is simple, the science is clear, and the soul of the world is at stake.

"True world leadership is not measured by the length of one's corridors, but by the stability of the ground upon which they are built. As 61% of India faces seismic vulnerability and the Third Pole melts, we call upon the G4 and President Macron to broker a peace with New World Order—one that respects the natural law of the Himalayas.

### EXECUTIVE SUMMARY: PLANET ENGINEERING - WORLD LEADER BRIEF

Most of the scientist generally believe the "laws" of the nature are unbreakable, if we see something new, it just means our understanding of the law was incomplete.

In this case, the Shiva Hypothesis warns that humanity has compressed millions of years of natural carbon accumulation into just 175 years, pushing current emissions to levels not seen for 4.5 million years. The hypothesis emphasizes that while nature has its own periodic cycles of destruction, current human activity—marked by massive contributions from nations like China (US 15 bn Tons ) US (6 bn tons), India (3.5 bn tons), and the EU (3.4 bn tons)—is artificially accelerating this "Natural Law" toward a tipping point.

The last window of negotiation between these Nations & Nature is open to save the planet.

#### The Global Threat Assessment;

- Seismic Crisis: 61% of India is under active earthquake alert; current Himalayan disruption is a direct trigger for regional war on climate change. We propose a "NO Disruption zone" mandate.
- Climate Feedback: The "Third Pole" is melting and releasing methane at a rate visible on satellite-mapped thermal "red zones." This has to be immediately noted for correction.

#### The Proposed Solution - Strategic Action Required;

- Industrial Pivot Transition - China's manufacturing dominance from carbon-heavy industries to affordable Green Energy and solar grid stabilization for the global south.

# PHURO INNOVATIONS

## SAVE THE THIRD POLE - HIMALAYAS

The lack of accountability from Super Powers regarding the planet sends a troubling message, showing a focus only on territorial concerns while ignoring the complex connections between our universe, nature, food chain, and carbon cycle. Phuro Innovations urges the global community to adopt renewable energy like solar, wind, and air to prevent conflicts over scarce resources.

At Phuro, Our first goal is to be the Voice of the Voiceless—the Himalayas, the source of life and water systems. We propose an intergovernmental organization for the Himalayas, with conflict management framework and Venn diagram of Peace.

## FOUNDERS DETAILED STATEMENT

Dear Friends

I am the founder of Phuro Innovations and I want to bring your attention to the region of South Asia today .

There has been a **Violation of "the Natural Law"** - and that is our framework post research and developed to create a Wild card in climate change policy making.

Let me brief you on the following Violation

**"If the Himalayas fall, the world follows. Today we are the voice of the voiceless - The Third Pole of the world,** The Himalayas, we are fighting for Planet Engineering - the biological and tectonic foundation of our planet.

Let me remind the World Leaders today that the **fundamental POLITICAL philosophy in International Relations is Nature /God is Supreme and he / she speaks via scriptures, the scriptures call The Third Pole, Himalayas the Soul of the Devas;** which I see has been put in RISK and has the new seismic Map puts the entire Himalayans belt in zone VI. That means **61 % of land and 70 % of the Indian population are at risk**, this reminds me of the Garhwal earthquake, one of the largest in the 19th century.

**That's why I think the New World Order & India must step up.**

Today, we offer a Venn Diagram of Peace: a logic-based roadmap that uses the manufacturing might of China, the diplomatic wisdom of France, and the spiritual heritage of India to create a non-disruptive sustainable future. The math, science & technology is clear, and the soul of the world is at stake." **Heads of State unite.**

When we say we have **crossed the 1.5 degree celsius** as the legal temp, set by The Paris Agreement and **legalized by International Court of Justice,** Enroads steps in, which is a sustainability initiative of MIT Sloan, hosting a data for last 200 years of carbon consumption the latest addition to that is location maps by geography. Here geology meets geopolitics. As the Temp rises in Artic, similar to Himalayas, the greed increases, to create new trade routes and establish **sovereignty over these no disruption zones of nature.**

Now NASA steps in, reestablishing Enroads facts, and signaling Red Alert over the Himalayas, with methane, carbon, satellite debris and pollution. This is because Land, Water and High Altitudes like Himalayas warm up differently, Himalayas melt releasing methane & carbon in permafrost creating regional vulnerability. **Hence we request the world leaders to stop human, military and technology experiments to hold the temp to 1.5 degree Celsius.**

# PHURO INNOVATIONS

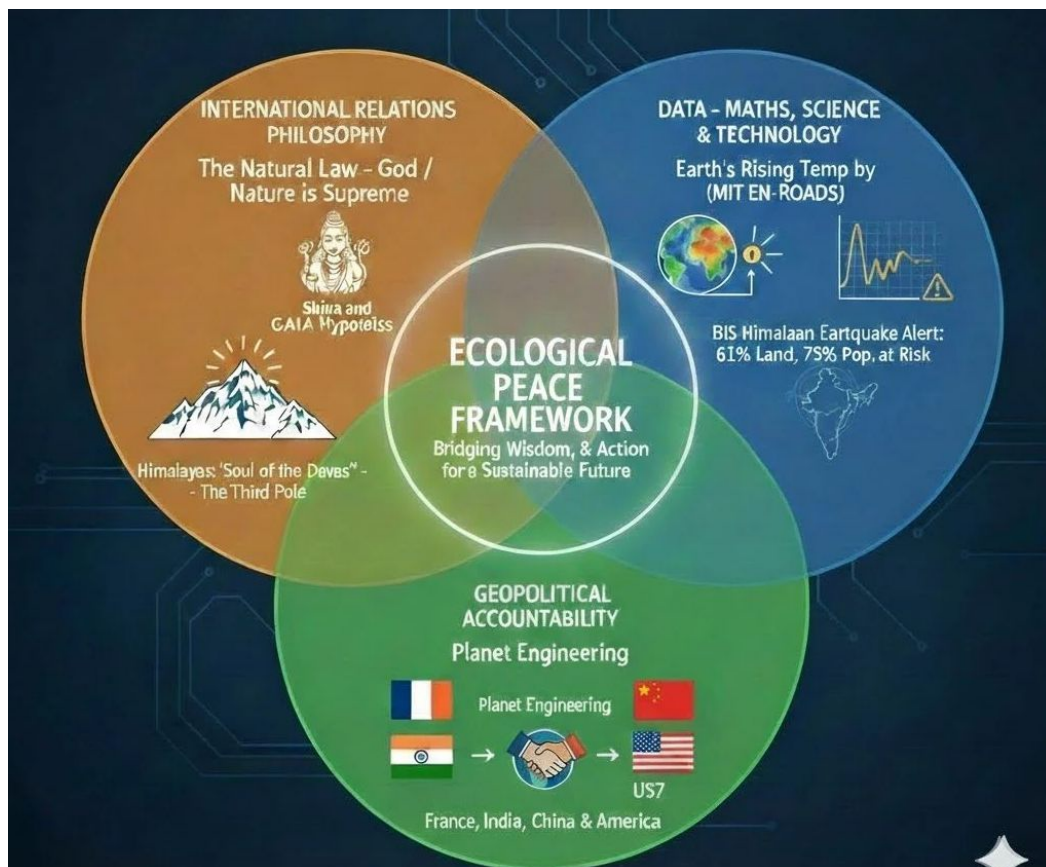

## FOUNDERS DETAILED STATEMENT

Most of the scientist generally believe the "laws" of the nature are unbreakable, if we see something new, it just means our understanding of the law was incomplete.

This is an exceptional case, the Shiva Hypothesis warns that humanity has compressed millions of years of natural **carbon accumulation into just 175 years**. This surge has pushed our current emission levels higher than anything the Earth has experienced in the **last 4.5 million years**.

The hypothesis emphasizes that while nature has its own periodic cycles of destruction, current human activity—marked by massive contributions from nations like **China (US 15 bn Tons ) US (6 bn tons), India (3.5 bn tons), and the EU (3.4 bn tons)**—is **artificially accelerating this "Natural Law" towards a tipping point**.

The last window of negotiation between these Nations & Nature is open to save the planet. So in this Ecological Framework of Phuro Innovations, I **explained you the first circle, with "Nature / God is Supreme" as political philosophy keeping in Mind the Shiva Hypothesis and The Third Pole - Himalayas**. Second circle empowers the first with latest available science like EnRoads and NASA

# PHURO INNOVATIONS

## FOUNDERS DETAILED STATEMENT

---

Let me now **explain you the third circle, which is Geopolitical Accountability.**

**America** was once seen as the world's environmental leader, its recent withdrawal from Paris agreement & 65 Intl Organizations, **has left a leadership void that China aims to fill.** We are willing to accept China's leadership, only if they prove their capability by making a firm commitment to **protect the planet.**

**Specifically,** China must explicitly guarantee; **"Safety of the Third Pole - The Himalayas, and ensure lasting harmony across the region".**

Following the recent India-EU deal, I am **officially calling on President Macron to carefully negotiate before voting on China's role in a new world order.** Instead of allowing China to wait until 2030 to lower its emissions, we must demand they immediately become a **"Green Laboratory"** for the world. The planet can **no longer afford any delay in China reaching its peak emissions.**

China can leverage its **cost-efficient manufacturing to provide the affordable solar, wind, and water technologies essential** for a global energy transition positioning China as the primary architect of a sustainable and harmonious world order. **You like crashing markets with pricing, here do it with Technologies like Green Hydrogen.**

### **"Statement of Intent by Rachna Sharma"**

We have declared war on the Earth, turning its sacred ground into barren land. We have poisoned the Water that gives us life, filling our rivers and oceans with waste.

We have abused the natural Fire of our planet, unleashing an imbalance of heat and chaos.

We have polluted the very Air we breathe, compromising the breath of life itself.

This is a crisis of conscience. It is a sign that we have forgotten the true meaning of peace. **We have violated the natural law. Peace is not merely the absence of war, but the presence of harmony with everything around us.**
